## Customer Reviews

In this eBook, there are 18 pages. The book is laid out, showing a photo of the animal with a few quick facts. The following page is a new photo of the same type of animal. The book continues to read this way throughout. This is great for young readers, as it keeps them engaged in the photos and doesnâ™t overload their minds with too much information, yet allows them to announce their thoughts when someone peaks their interest. The Rhinoceros Beetle mentioned in this eBook, was my daughterâ™s favorite. We had seen a few stag beetles in our yard last summer, and she instantly reminded me that she had seen one like that before! She was so excited! I will mention that I have downloaded the collection of these short kid animal encyclopedias, so I will be sharing some

very similar experiences in each of those reviews, since they have the same features, except for the title and contents. As with each of these eBooks, they are an easy quick read for a young child. The photos are beautiful and realistic, giving you the feeling that you can reach out and touch the animals in them. Each book begins with a quick fact. I love that the facts are simple and quick, so that I can read each sentence to my daughter, and then if she doesn't understand, then I can explain it to her. (She is 5 years old, so still very new to some of the things mentioned here – but could easily be understood by your average 8 year old+). I was pleased to have learned a few things myself while reading through this eBook with her. As we all know how important reading is for our children, I am glad that this was a great bonding experience with my daughter. I am rating this eBook 3 stars. 1 star for photo quality, 1 star for simplicity, 1 star for the facts contained.
