Customer Reviews

No matter how hard I search, I've yet to find the "perfect" book on herb use and herb growing. This book isn't perfect, but it does have some real strengths. Rodale's ILLUSTRATED ENCYCLOPEDIA OF HERBS is organized in a strange way--everything, and I mean everything--falls into alphabetical order. For example, "Gardening with Herbs falls between "Foxgloves" and "Garlic" and "Growing Herbs" falls between "Grindellia" and "Hawthorn." The book is printed on semi-gloss paper so it will stand up to use and not crumble in a few years. Each entry contains line drawing illustrations and a few sections of the book are highlighted with color photos. The plant profiles are succinct, covering topics such as 'history', 'cultivation' and 'uses.' Many entries contain material from other sources such as Maud Grieve's A MODERN HERBAL Vols. 1-2. Some information is repeated without attribution or verification. I always find "They say" and "It is thought" offputting, while I appreciate direct citations of which there are many in this book. THE ENCYCLOPEDIA covers some topics not readily found in other books. The most useful of these is a compendium discussing the "Dangers of Herbs" (located between "Dandelion" and "Deadly Nightshade." The editors have compiled the FDA listing of "tricky" herbs (could kill or cure depending on use) from PREVENTION magazine, as well

as similar ratings from James Duke's CRC HANDBOOK OF MEDICINAL HERBS, Jean Rose's HERBS AND THINGS, and Varro Tyler's THE HONEST HERBAL. You realize on reading this section that everything is relative.
