Customer Reviews

Why are some reviewers here so hostile that they almost seem to be venting their anger here? Feng Shui is a philosophy... it may not be a religion, but it is a philosophy, so it requires a certain amount of belief from you if you want to make use of what it has to offer. If you don't believe in it, fine... just sell your book secondhand through Marketplace.. why get frustrated?? Personally I think this book is not the best out there on Feng Shui. Hanging crystals everywhere is plain silly-looking and hanging baguas around the house give me a creepy feeling, not to mention that guests might feel the same, etc. With over 300 Feng Shui titles sold in the market, it can be very tricky deciding which book to buy. Some people buy them for the beautiful colours and pictures of the examples in the books, others for the knowledge. If you're like me wanting to really get into the subject and apply it to your interior designing, there are much better Feng Shui books sold out there which give a much more proper treatment of the subject - you won't feel silly after reading them. They are "The Complete Idiot's Guide To Feng Shui" by Elizabeth Moran and "A Master Course In Feng Shui" by Eva Wong. And if you want to know more, "Flying Star Feng Shui Made Easy" by David Twicken is good and so is "The Living Earth Manual of Feng Shui : Chinese Geomancy" by Stephen Skinner are really great books geared to the Western reader with authentic Oriental knowledge. I am agnostic (I don't believe the existence of God can be proven although I don't rule it out either) but I found Feng Shui to be a deeply spiritual subject with close links to form and functionality of objects and space, and aesthetics. I have a great deal of interest in design...
