This is a great book for any novice meal planners and preppers and less for those who already have developed appropriate meal prep habits. For those who are just getting into meal planning this is a good resource as it covers some of the basic tenants of meal prep and planning that can help reduce the waste of time and / or food. For those who already have experience in meal prep and planning this can serve as a good refresher but the real take away is the recipes. There are tons of recipes included and these cover a variety of recipes and they are geared towards preparing for two. Although I received this book for free, I am looking forward to trying out lots of the recipes that are included.

I am really interested in finding the best foods for myself and my family and this book went a long way in helping me. I found so much good information in his book so if your trying to stay healthy I

would say buy the book also the one with drinks in. That said, there are some good side dish recipes in this book. Also, a lot of the recipes are not low carb friendly at all, which I feel is more important than being just plain low calorie. I like to even things out there. Highly recommended!

Awesome, another book of Don Orwell, I like so much his book, plenty of information about health. This is appropriate specially for the health conscious person. Superfoods cooking are really healthy and beneficial for our body. Widely available and nutritional as well. This is the only diet that doesn't restrict any major type of food. The recipes are easy to follow and to understand.
